Specialty imaging procedures requiring Radiologist services must be scheduled in advance. This includes all Computed Tomography (CT), Interventional radiography (IR), Magnetic Resonance imaging (MRI), Nuclear Medicine (NM), and Ultrasound (US).

Examination requests of an Emergency nature are performed only on approval of the designated Radiologist and it is expected that the ordering physician will consult directly with the Radiologist.

Emergency Casualty Officers and Neuroscience physicians are authorized in an emergency situation, to initiate Computed Tomography Head examinations and Abdominal Computed Tomography procedures for renal calculi.

The following examinations are available on a scheduled basis:
